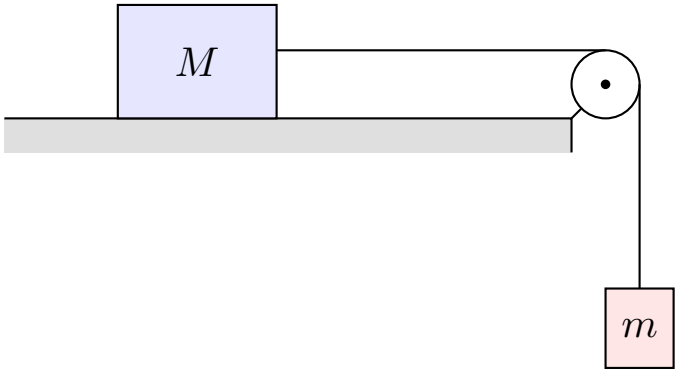
Task 6: Block and hanging weight over a pulley


A block with mass $M = 2.0\,\text{kg}$ lies on a horizontal table. The block is attached to a hanging weight with mass $m = 0.50\,\text{kg}$ by a massless string that runs over a frictionless pulley, as shown in the figure. The coefficient of friction between the block and the table is $\mu = 0.15$. The system is released from rest.
