

mdOffice: The Office suite in a code editor

Turn VS Code into your main office workplace using Markdown and LaTeX

Contents

1	Use AI to generate template markdown and LaTeX code	1
2	Built with a few frontmatter keys	1
2.1	Frontmatter keys used here	1

This PDF is built entirely from the Markdown file that produced it, using small LaTeX blocks for things like **math** and **footnotes**. Standard LaTeX **references** and **labels** work too. The logo, colored title block, header, live math, and table of contents are all driven by the frontmatter block¹ above and a user customizable doc-style theme.

1 Use AI to generate template markdown and LaTeX code

Inline math written in LaTeX looks like this: $x^2 - 5x + 6 = 0$.

$$x^2 - 5x + 6 = 0 \tag{1}$$

$$x = \frac{5 \pm \sqrt{(-5)^2 - 4 \cdot 1 \cdot 6}}{2 \cdot 1} \tag{2}$$

$$x = 2 \quad \text{or} \quad x = 3 \tag{3}$$

2 Built with a few frontmatter keys

Everything you see on this page (the logo, the colored title, the header, the contents list) comes from a handful of keys in the frontmatter block. The `doc-style` theme itself lives in `_core_v2/scripts/themes/exam.tex` and can be edited directly, or copied as a starting point for your own theme.

2.1 Frontmatter keys used here

Key	What it does
<code>make-pdf: true</code>	Builds a PDF from this file on save
<code>doc-style: exam</code>	Selects this theme: logo in the header, colored title block
<code>titlebg</code>	Sets the title block's background color
<code>titlebgpad</code>	Sets the padding around the title text inside that colored block
<code>logo</code>	Places the logo in the header of every page
<code>header</code>	The right-aligned text at the top of every page
<code>page-numbering: true</code>	Shows page numbers on every page
<code>toc: true</code>	Generates the contents list above

¹The frontmatter block has two parts. The top level keys (`title`, `subtitle`, `fontsize`, `logo`, `toc`, `numbersections`) are standard Pandoc keys. The keys nested under `mdoffice:` (`make-pdf`, `doc-style`, `titlebg`, `titlebgpad`, `header`, `page-numbering`) are mdOffice's own keys.
