Plain heading (the default)

Headings have no background color unless you ask for one. Write a color macro on the line right after a heading, exactly as in fancybeamer, to give that one heading a colored bar.

Blue: theorem and focus box

Definition

A **set** S is *finite* if there exists a bijection $S \to \{1, \dots, n\}$ for some $n \in \mathbb{N}$.

1: Definition (numbered)

Same box, numbered and referenceable.

bluefocus: for key formulas or remarks without a formal label.

$$e^{i\pi} + 1 = 0$$

Red: theorem and focus box

Theorem

For all $a, b \in \mathbb{R}$:

$$(a+b)^2 = a^2 + 2ab + b^2$$

redfocus: for warnings or anything that demands immediate attention.

Back to plain

The previous heading was red, but this one is plain again. Colors never carry over to the next heading.

Green: theorem and focus box

2: Example (numbered)

Let $f(x) = x^2$. Then $f'(x) = 2x$, so the slope at $x = 3$ is $f'(3) = 6$.

greenfocus: for worked examples or intuition.

Cyan subheading

Exercise

Compute $\displaystyle\int_0^1 x^2 \, dx$.

cyanfocus: for exercises or student prompts.

Gray subheading

Text can start on the line right after the macro.

Exploration

Compare $\|u+v\|$ with $\|u\|+\|v\|$.

grayfocus: for background remarks.

Macros

- **Not part of the syllabus**
- **For your information**
- **Custom warning in any color**
- **Custom info in any color**
