Colored headings

This heading has a blue bar. The next heading has no macro, so it is plain.

A plain heading

Colors never carry over from one heading to the next.

Boxes

Definition

A **prime number** is a whole number greater than 1 that can only be divided by 1 and itself.

1: Theorem

In a right triangle with legs a and b and hypotenuse c:

$$a^2 + b^2 = c^2$$

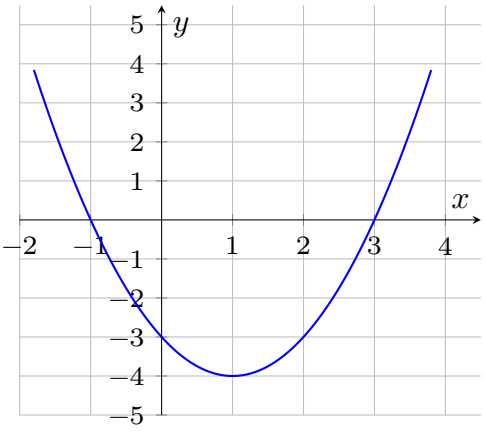
Tip: Check your answer by putting it back into the original equation.

Two columns

The Python code computes some values of $f(x) = x^2 - 2x - 3$. The graph on the right shows the same function.

```
def f(x):
    return x**2 - 2*x - 3

for x in range(-1, 4):
    print(x, f(x))
```



LaTeX tables

Plan for the chapter		
Week	**Topic**	**Test**
1	Linear functions $f(x) = ax + b$ and their graphs	
2	Quadratic functions: zeros, vertex and the quadratic formula	Yes

Warning and info

- Not part of the syllabus
- For your information
- Remember units in every answer
- This section is a repetition
